

A SUCCESSFUL PRESENTATION was held Tuesday evening at Garrett College, where over 50 persons gathered to hear MD SUN's program director Corey Ramsden explain how to form a solar cooperative. Ramsden gave detailed information on solar and co-op technology, costs, management, and other information to encourage western Marylanders to form a group. A local co-op, he said, would make incorporating solar power easier and save individuals/businesses up to 20% of costs. Interested persons can learn more and/or sign up

online at www.mdsun.org/mountain-md. It was noted that becoming a member is not a commitment to purchase panels. Once the group is large enough, MD SUN (Maryland Solar United Neighborhoods) will help obtain competitive bids from area installers. Once a company is selected, group members will have an opportunity to purchase panels based on the installer's group rate. "This is a wonderful opportunity to save money and help save our environment by using a renewable energy source," stated a presentation organizer.
